

ARCHITECTURAL ROOFING AND WALL CLADDING

Turning design into reality.

Supply and installation for Melbourne's residential builders and architects, from tender through to handover.

2013

Established

450+

Projects completed

40+ yrs

Combined specialist experience

WHO WE ARE

Specialists in the architectural envelope.

A boutique Melbourne company specialising in architectural roofing and wall cladding on residential and heritage projects, across Melbourne, the Mornington Peninsula and regional Victoria.

Owned and run by craftsmen, with over 40 years of combined specialist experience in Europe and Australia. We value personal relationships, and we care how things are done.

We are an approved VM Zinc installer, enabling clients to get a 50-year material warranty from VM Zinc.

SYSTEMS

Standing Seam
Flatlock
Interlocking
Nailstrip / Snaplock
Custom powder-coated aluminium cassette

SELECTED PROJECTS

Precision in every fold.

Acute House - Albert Park by OOF! architecture

Standing Seam and Flatlock · Vestis Aluminium Black Graphite

St Kilda by Richard Kerr Architect

Standing Seam · Unicote Zinc Graphite

Hawthorn by Nicholas Murray Architects

Standing Seam and Flatlock · Copper

HOW WE WORK

Compliance and detailing, resolved early.

Michael reviews every set of drawings, completes the take-off and estimate, and flags anything that needs a conversation: junction details, substrate, condensation management or NCC compliance. The earlier these points are raised, the better the outcome for design, function and compliance. Most of our work comes from builders who come back, because we treat every project as the start of a long relationship

Both directors are hands-on with every project. Michael looks after preparation and administration through to deposit, then Paul leads the site teams from measure to installation. Our own team installs every job, because we care how things are done.

01 Drawings

Received, reviewed and measured up

02 Quote

Usually within a few days

03 Revisions

Value management with your team

04 Approval

Quote approved, deposit paid, handover to site

05 Lead time

Around 2 to 4 weeks from deposit

06 Site measure

Site visit to confirm dimensions

07 Materials

Ordered, delivered to site usually within 4 days

08 Installation

By our own team, through to handover

Licensed roof plumber

Paul Bowd
Licence 39583

Fully insured

\$10M public and products liability

WorkCover

Registered in Victoria.
